

# Energy Solutions

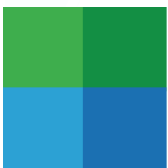

Our mission is to bring innovative solutions to the energy industry that will increase a company's efficiency, provide quality results and create a competitive advantage for our partners, while considering return on investment.

## Our Initiatives (Four Phases):

- 1) **Installation** – Providing solar sales organizations access to a contracted solar power installation solution for consistent best practices and processes that result in decreased operating costs.
- 2) **Efficiency** – Bringing energy efficiency and building performance practices to companies to create a more robust offering.
- 3) **Training** – Providing the skills for excellence through education and hands on techniques for energy professionals.
- 4) **Workforce Development** – Bringing education and employment together through networking and skills assessment.
